Dr Cogliano serves as head of the IARC Monographs program at the International Agency for Research on Cancer (part of the World Health Organisation) in Lyon, France. The IARC Monographs are a series of scientific reviews that identify environmental factors that can increase the risk of human cancer.

Dr Cogliano received his PhD from Cornell University, then worked for 20 years in quantitative risk assessment at the U.S. Environmental Protection Agency in Washington. Professional interests include cancer hazard assessment, qualitative and quantitative health risk assessment in general, and identification of susceptible populations and stages of development.
